Additional Information

In line with JCQ guidance, wherever possible the same range of evidence should be used for all students in a class or cohort, although there may be individual students for whom the proposed evidence is not appropriate. The rationale for any exceptions will be documented by the centre

Where some subjects are using fewer sources of evidence to consider as part of the grading process, they would have been omitted for the reasons listed below:

- An inability for all students' evidence to be applied consistently
- Questions over the validity of work being produced independently
- Examination boards had reduced the content due to the impact of Covid-19
- Suitability of internal work to contribute towards the grading process.
